TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, Swift, HTML5, CSS3

Frontend: React.js, Redux, Micro-Frontend Architecture, Responsive & Cross-Browser UI, Complex Data Tables & Visualizations

Mobile: iOS (Swift, UIKit)

Testing: Playwright (Automated UI / E2E Testing)

APIs & Integration: REST API Integration, JSON

Design & Collaboration: Figma, Client Demos, Code Reviews, Mentoring

Tools & Methods: Git, GitHub, GitHub Copilot / AI-assisted Development, Agile

WORK EXPERIENCE

State Street

Dec 2024 – Present

Global financial services and asset-management firm

Senior Associate, UI Developer

- **Lead the end-to-end migration** of the Recon Optimized Workflow platform (**30+ complex screens** used by **5,000+ users** across Back Office, Middle Office, DAG and Global Advisors) from React 16 to React 18 and into a **micro-frontend architecture**, with **2 senior engineers reporting to me**.
- Cut the migration timeline by **40–50%** by bringing GitHub Copilot and AI coding agents into the team workflow, while modernising the legacy component library to remove known **security vulnerabilities**.
- Build and optimise data-heavy reconciliation grids rendering **100+ columns and hundreds of thousands of records**, and redesigned the core table to surface **22 records per view (up from 14)**, helping users complete their reconciliation SLAs faster.
- Act as the **go-to engineer** for UI and process issues, working directly with users to triage and resolve production problems.
- Mentor **2 junior developers** and own code reviews for the team, raising UI code quality and consistency.

Creat Data

Jan 2022 – Nov 2024

Software product company building front-ends for cloud-security, DLP and enterprise SaaS products

Software Engineer

- Owned the entire **search module** of FENS, a cloud-security platform, building it in **React, TypeScript and Redux** within a **micro-frontend** architecture.
- Built complex data-table views that dynamically rendered **graph, table and text** outputs based on the user query and result type.
- Sole UI developer on **Netskope Data Loss Prevention**: owned the end-to-end UI, wrote automated UI tests in **Playwright**, and ran multiple client demos.
- Joined Crest Rating Management System as **founding UI engineer**, designing the UI and finalizing the front-end tech stack.
- Built a native **iOS app (Swift, UIKit)** for an HRMS product and designed its UI in Figma.

EDUCATION

Nirma University

2018 – 2022

B.Tech in Computer Science — Passed with Distinction (CGPA 7.7 / 10)

CERTIFICATIONS & ACHIEVEMENTS

- **GitHub Copilot Certified (GH-300)** · **Snowflake Associate Certified**
- Authored a [technical blog on React internals](#) (how index.js runs in a React app) with **5,000+ views**.
